As the Coronavirus continues to invade the US and spread very quickly, I would like to reassure everyone that the CDC is doing everything they can, and not only do they have Your best interest at heart, the CDC has their best people on the situation.
Let's meet who's in charge.

Nancy Messonnier, MD

Nancy Messonnier, MD, is the Director of the Center for the National Center for Immunization and Respiratory Diseases (NCIRD). Since beginning her public health career in 1995 as an Epidemic Intelligence Service Officer in the Deputy Director for

has held a number of leadership posts across CDC and within NCIRD. She served as Deputy Director of NCIRD from October 2014-March 2016, and led the Meningitis and Vaccine Preventable Diseases Branch in NCIRD's Division of Bacterial Diseases from 2007-2012.

Dr. Messonnier has provided critical leadership to CDC's cross-cutting

In case you don't recognize the name, that's Rod Rosenstein's SISTER, a "limit the world population to 500k to 5Mil" person. Who has for her entire career pursued airborne/epidemic specific diseases as a means of population control.
And now she's in charge.
Feel safer?

Just in case anyone is curious, you can verify with RedPill78. Just prior to my interview with him and truReporting, off air, we specifically discussed Rod's sister and her long time plans, as well as her attempts, thru Rod, to get some older research "I'm aware of". 😎

It's nice that you have admitted you were behind the fraudulent complaint that has disabled my Rally account. First you post on my timeline that a "concerned citizen" shut my account down.

Hello everyone. As many know I have recently been attacked for speaking out and trying to demonstrate the corruption within the Deep State. Anyone on Twit or social media is no stranger to attacks. But this attempt to divide and corrupt is insidious, hidden, and well funded.

As they often do the bad actors will overplay their hand and eventually expose themselves. They come dressed in sheep's clothing, commiserate, insinuate, control, then destroy. Then their infection moves on.

Congratulations, you found the name I worked under. Pretty sure I mentioned that wasn't my real name.😳 I am Ryan White in the suit. Did you think I was dumb enough to give you my real identity? You have just publicity done your best to doxx me and expose myself and my family

to harm. You have even posted the names of people involved in murder, and other crimes, all in a effort to harm me and my family. Ms. Attkisson suit was filed for a specific purpose, and it leads directly into my suit, then into Federal Felony

There are a wide variety of factors that all seem to be working together to contribute to the 'hysteria', as you call it. It takes some time to explain them, so I'll turn this into a thread to

help explain, if you don't mind. There are several things you have wrong, to start.

Let's begin at the beginning, when trying to explain why some people find 2019-nCoV or #coronavirus to be particularly concerning. For reference materials, please use the CDC and/or WHO pages as good starting points:

.@DrTedros is reconvening the @WHO emergency panel on #coronavirus on Jan. 30 to determine if #PHEIC is needed for #2019nCoV / #nCoV2019

mentions This is a week after @DrTedros & @WHO emergency committee said there was not enough evidence. Back then, there was 800+ cases of #2019nCoV / #nCoV2019 & 25 deaths. Now, there are over 6100 cases & more than 130 deaths spglobal.com/marketintellig… en.wikipedia.org/wiki/2019%E2%8… #coronavirus

"Where did the 🦠 come from?" is one of the most asked questions. First, I don't like unsupported conspiracy theories, but it's a lingering question. @sciencemagazine examined this based on Lancet article. Nobody knows, but seafood market isn't whole story sciencemag.org/news/2020/01/w…

2. Again, no outright conspiracy theories please. Here is another explanation: The new #coronavirus is an RNA virus —that is, viruses that have RNA as their genetic material rather than DNA—which have a "high mutation rate," which
